SCIENCE EDUCATION INTERNATIONAL

ISSN 1450-104X

Science Education International is the quarterly journal of the International Council of Associations for Science Education (ICASE). ICASE was established in 1973 to extend and improve education in science for all children and youth by assisting member associations throughout the world. This journal provides a means for associations, institutions, centres, foundations, companies, and individuals concerned with science education to share perspectives, concerns, ideas, and information that will foster cooperative efforts to improve science education, and which will serve as a chronicle of the advancement of science education throughout the world.

Science Education International, ISSN 1450-104X, offers a worldwide balance between a primary, secondary, and a tertiary level focus. All articles are peer reviewed and should be relevant to an international readership. The articles appearing in this journal are indexed and abstracted in COPERNICUS INDEX and ERIC.

Editor

Nicos Valanides, Cyprus

Associate Editor

Charoula Angeli, Cyprus

Section Editors

Adam Niculescu, USA
